

**Last year, more than 1.3 million
Americans chose not to die this way.**

Instead, they called hospice.

Don't let the Administration take away compassionate end-of-life care.

Hospice isn't about dying. It's about living until you die. We believe patients should spend their precious time at home, surrounded by family and friends. Yet the Administration has circumvented congressional authority by cutting Medicare funding for hospice care through a regulatory maneuver. The cuts are short-sighted and irresponsible - especially since hospice saves Medicare more than \$2 billion each year. Congress needs to step in and block this back door rate cut. Act now to block these rate cuts and help protect hospice for all Americans.

THE ALLIANCE FOR CARE
AT THE END OF LIFE

Congress, keep compassion in end-of-life care.

Protect hospice for America.
