LEADERSHIP QUALITY ACCESS INNOVATION

National Hospice and Palliative Care Organization

2011 ANNUAL REPORT

Message from Don and Mark

As we look back over the many accomplishments of the past year, there is nothing that gives us more pride than reporting that we had a 99 percent member renewal rate in 2011. This is a reflection of the impressive work accomplished together—by NHPCO and you, our members.

We have completed the second year in our 2010-2012 Strategic Plan and we have done much to reinforce our strong and purposeful focus on advancing care at the bedside. Yes, there have been challenges, such as increasing regulatory demands, threats to reimbursement, and the evolving profile of the hospice community and the patients we care for. By addressing these challenges directly and allowing our strategic plan to guide us, we have discovered opportunities to enhance quality and expand innovation as we work to define the continuum of care.

Please take a moment to review this report. These representative accomplishments are organized according to the four key pillars outlined in our current strategic plan: Leadership, Quality, Access, and Innovation. While it is just a snapshot of our achievements, it offers us a valuable reminder of what we have accomplished.

There are no professionals better skilled at caring than those found in this country's hospice and palliative care community.
