Evaluation of Grief Support Services Survey

Elective Modules and Questions

HOW TO USE THE EGSS SURVEY ELECTIVE MODULES AND QUESTIONS

1. Bereavement Component Modules

- The following modules represent various components of hospice bereavement programs:
 - Grief Support Mailings
 - Grief Support Telephone Calls
 - o In-Person Grief Support Visits
 - o Grief Support Groups
 - Other Grief Support Services
- Your hospice may offer all of these components. If so, then use the generic or the customized version of the EGSS survey without making any modifications.
- Or, your hospice may offer only some of these components. In that case, you may remove those modules from the survey that relate to those bereavement program components your hospice does not offer.

2. Demographic Module

- The About You module provides demographic information about the survey respondents.
- This information tells about the caregiver population who are providing the
 information you use to evaluate your bereavement program. Demographic
 information is useful in program evaluation by allowing you to identify which
 segments of your bereavement client population answer the survey and whether
 particular groups provide more or less favorable evaluations.
- If you prefer not to ask demographic information you may remove this module from the survey. Or if there are one or more demographic questions that you prefer not to include, you may remove only those questions.

3. Elective Questions

- There are two required modules which include some questions that you may choose not to include in your EGSS survey.
- General Grief Support Module
 - Question 2.a is required. Questions 2.b, 2.c, and 2.d may be removed if your hospice does not offer the bereavement program components these questions ask about.

• Overall Module

o Questions 1, 2 and 3 are required. Questions 4, 5, 6, and 7 provide useful contextual information and feedback, but may be removed if you prefer.
