2024 ICD-10-CM Dementia Fact Sheet¹

Dementia is classified in ICD-10-CM into 3 categories (types), based on etiology:

- Vascular, F01.-
- In diseases classified elsewhere, F02.-
- Dementia Unspecified/NOS, F03.-

Severity of the dementia [documented as mild (A), moderate (B) or severe (C)] is now an integral element of the diagnosis code (effective with DOS 10-01-2022 and later).

Mild dementia [F01.A-, F02.A-, F03.A-] Clearly evident functional impact on daily life, affecting mainly instrumental activities. No longer fully independent/requires occasional assistance with daily life activities.

Moderate dementia [F01.B-, F02.B-, F03.B-] Extensive functional impact on daily life with impairment in basic activities. No longer independent and requires frequent assistance with daily life activities.

Severe dementia [F01.C-, F02.C-, F03.C-] Clinical interview may not be possible. Complete dependency due to severe functional impact on daily life with impairment in basic activities, including basic self-care.

Severity stage definitions from ICD10 C&M Committee meeting proposal (March 10, 2021)²

Dementia with or without behaviors completes the Dementia code assignment/s:

Dementia without behaviors is represented by zero (0) as the 5th/final character in the new diagnosis code assignments, following the type and severity of the dementia:

[F01.-, F02.-, F03.-] <<u>plus></u> [-.A-, -.B-, -.C-] <<u>plus></u> [-.-0]

**Dementia with behaviors is represented by one to two final (5th/6th) characters:

- -11 Agitation [such as, aberrant motor behavior such as restlessness, rocking, pacing, or exit-seeking; verbal or physical behaviors such as profanity, shouting, threatening, anger, aggression, combativeness, or violence]
- -18 Other specified behavior/s** [such as, sleep disturbance, social disinhibition, or sexual disinhibition. Use additional code (Z91.83) to identify wandering in dementia, if applicable.]
- -2 Psychotic disturbance [such as, hallucinations, paranoia, suspiciousness, or delusional state]
 - **-3 Mood disturbance** [such as, depression, apathy, or anhedonia]
 - -4 Anxiety

When the classification of Dementia is "In diseases classified elsewhere" [F02.---], remember to Code First the underlying physiological condition, such as:

G20.-3 - Parkinson's Disease

G30.0 - Alzheimer's disease with early onset, G30.1 - Alzheimer's disease with late onset

G31.83 - Dementia/Neurocognitive disorder with Parkinsonism or with Lewy bodies

G35 - Multiple Sclerosis

E53.8 - Vitamin B deficiency

E00-E03 - Hypothyroidism

When Vascular Dementia [F01.---] is a result of infarction or other cerebrovascular disease, **remember to Code First** the underlying physiological condition or sequelae.

The disease of Dementia is classified in ICD-10-CM into 3 categories* (or types) of dementia, with and without behaviors.

Dementia <u>Behaviors</u> (with or without) complete diagnosis codes beginning with the dementia type and severity:

DEMENTIA

category + severity [F01.-, F02.-, F03.-] [.A-, .B-, .C-]

PLUS additional one to two code digits, depending on behavior/s specified [2, 3, 4, 11, 18 or 0]**

Examples?

- Vascular dementia, mild, no behaviors: F01.A0
- ✓ Senile dementia, severe, with anxiety: F03.C4
- ✓ Alzheimer's dementia, early onset, moderate, with agitation (aggression) and other behaviors/insomnia:

G30.0+F02.B11+F02.B18+G47.00

*When dementia is present with alcohol or other psychoactive substance disorders, the following ICD-10-CM diagnosis codes may provide more appropriate specificity.

Current dementia diagnosis codes in psychoactive substance disorders:

F10.27 ETOH-related dependence persisting dementia

F10.97 ETOH-related use persisting dementia

F13.27 <u>Sedative</u>/anxiolytic dependence persisting dementia

F13.97 Sedative/anxiolytic use persisting dementia

F18.17 <u>Inhalant</u> abuse persisting dementia F18.27 Inhalant dependence persisting dementia

F18.97 Inhalant use, unspecified, persisting dementia

F19.17 Other psychoactive substance abuse persisting dementia

F19.27 Other psychoactive substance dependence persisting dementia F19.97 Other psychoactive substance use, unspecified, persisting dementia

¹ This is not intended to be an all-inclusive list of codes and exclusions. As in all coding matters, clinical documentation should drive code selection along with coding guidelines and conventions, and payer policies. ² Selection of the appropriate severity level requires the provider's clinical judgment and codes should be assigned only on the basis of provider documentation (see Section I.C.5.d.). ³ See Classification: Parkinson's diagnosis code expanded effective 10-01-2023.

	FY2024 ICD-10-CM DEMENTIA DIAGNOSIS CODES	SUMMARY
Dementia	is classified in ICD-10-CM into 3 types, or categories, based on etiology:	ICD-10-CM organizes Dementia into 3* categories (types), with or
	01], In diseases classified elsewhere [F02], and Dementia Unspecified/NOS [F03]	without behaviors:
The severity	y of the dementia is now an integral part of the diagnosis code assignment, with identification	Vascular Dementia [F01codes]
of behavior	s (with/which, or without behaviors) completing the dementia code/s assignment for each	Dementia in diseases classified elsewhere [F02-codes]
patient, eac	ch encounter.	Unspecified (or NOS) Dementia [F03codes]
	(Effective with DOS of 10/01/2022 and	
	f the dementia [documented as mild (A), moderate (B) or severe (C)] is now an	
integral ele	ement of the diagnosis code.	
Mild do	mentia Clearly evident functional impact on daily life, affecting mainly instrumental activities.	ALL Dementia Behaviors (with or without) are now assigned
	ully independent/requires occasional assistance with daily life activities.	diagnosis codes based on the dementia type and severity
<u>Moderate dementia</u> Extensive functional impact on daily life with impairment in basic activities. No longer independent and requires frequent assistance with daily life activities.		<u>Dementia subcategory/type</u> + <u>severity</u> [F01, F02, F03] [.A-, .B-, .C-]
Severe dementia Clinical interview may not be possible. Complete dependency due to severe		PLUS additional one to two final code digits, depending on behavior/s specified [2, 3, 4, 11, 18 or 0]**
functional i	mpact on daily life with impairment in basic activities, including basic self-care.	
	Severity stage definitions from ICD10 C&M Committee meeting proposal (March 10, 2021) 1	
**Dementi	a <u>with behaviors</u> , has <u>5 new diagnosis codes (by type/severity) for behavior specificity</u> :	Dementia <u>without behaviors</u> also has new diagnosis codes.
		Dementia <u>without behaviors is represented by zero (0)</u> as the
	tation [such as, aberrant motor behavior such as restlessness, rocking, pacing, or exit-seeking;	5th/final character in the new diagnosis code assignments,
verbal or ph or violence]	nysical behaviors such as profanity, shouting, threatening, anger, aggression, combativeness,]	following the type and severity of the dementia:
	er specified behavior/s** [such as, sleep disturbance, social disinhibition, or sexual n. <i>Use additional code (Z91.83) to identify wandering in dementia, if applicable.</i>]	[F01, F02, F03] < <u>plus></u> [A-,B-,C-] < <u>plus></u> [0]
	hotic disturbance [such as, hallucinations, paranoia, suspiciousness, or delusional state]	Dementia-without-behaviors existing diagnosis codes [F01.50,
<u>-3</u> Moo	d disturbance [such as, depression, apathy, or anhedonia]	F02.80, F03.90] are <u>revised</u> for use only as <u>Dementia</u> (by type),
<u>-4</u> Anxie	ety	with unspecified severity without behaviors.
*In additior	n to these 3 subcategories, there are a few special diagnosis codes for when dementia is seen	
in alcohol a	nd psychoactive substance disorders. A recap of current substance-related dementia	İ

Also use Z91.83 to identify wandering, if applicable Excludes1: mild neurocognitive disorder due to known physiological condition with or without behavioral disturbance (F06.7-)
F01.5- F01.511 F01.518 F01.52 F01.54 F01.A-	FY2023 ICD-10-CM NEW DEMENTIA DIAGNOSIS CODES Effections (sourced from official ICD-10-CM publications¹) Mental, Behavioral and Neurodevelopmental disorders Vascular Dementia (formerly F01.50 or F01.51) Vascular dementia as a result of infarction of the brain due to vascular disease, including hypertensive cerebrovascular disease. Code first the underlying physiological condition or sequelae of cerebrovascular disease. Expands to address severity of dementia as mild, moderate or severe Provides additional diagnosis codes for behaviors: agitation, anxiety, psychotic disturbances, mood disturbances, other behaviors, by dementia type/subcategory Vascular dementia, unspecified severity, Vascular dementia, unspecified severity, without behavioral disturbance, psychotic disturbance, mood disturbance, and anxiety Major neurocognitive disorder due to vascular disease NOS Vascular dementia, unspecified severity, with agitation Vascular dementia, unspecified severity, with other behavioral disturbance Vascular dementia, unspecified severity, with psychotic disturbance Vascular dementia, unspecified severity, with mood disturbance Vascular dementia, unspecified severity, with anxiety Vascular dementia, mild Mild dementia: Clearly evident functional impact on daily life, affecting mainly instrumental activities. No longer fully independent/requires occasional assistance with daily life activities.	Official Notes, Helpful Tips, Reminders Includes: arteriosclerotic dementia, major neurocognitive disorder due to vascular disease, multi-infarct dementia Vascular dementia, mild: F01.A Vascular dementia, moderate: F01.B Vascular dementia, unspecified: F01.5 FYI: F01.50 is revised for use only as unspecified severity (without behaviors). Also use 291.83 to identify wandering, if applicable Excludes1: mild neurocognitive disorder due to known physiological condition with or without behavioral disturbance (F06.7-) Includes: Major neurocognitive disorder due to vascular disease,

ICD Code	Code Descriptions (sourced from official ICD-10-CM publications ¹)	Official Notes, Helpful Tips, Reminders
		, , , , , , , , , , , , , , , , , , ,
F01.A3 F01.A4	Vascular dementia, mild, with mood disturbance Vascular dementia, mild, with anxiety	
F01.B-	Vascular dementia, moderate	
	Moderate dementia: Extensive functional impact on daily life with impairment in basic	
	activities. No longer independent and requires frequent assistance with daily life activities.	
504.50		
F01.B0	Vascular dementia, moderate , without behavioral disturbance, psychotic disturbance, mood disturbance, and anxiety	Includes: Major neurocognitive disorder due to vascular disease, moderate, NOS; Vascular dementia, moderate, NOS
504.544		inioderate, NOS, Vascalar dementia, moderate, NOS
F01.B11 F01.B18	Vascular dementia, moderate, with agitation Vascular dementia, moderate, with other behavioral disturbance	Also use Z91.83 to identify wandering, if applicable
F01.B18	Vascular dementia, moderate, with other behavioral disturbance Vascular dementia, moderate, with psychotic disturbance	Also use 291.03 to identify wandering, if applicable
F01.B3	Vascular dementia, moderate, with mood disturbance	
F01.B4	Vascular dementia, moderate, with anxiety	
F01.C-	Vascular dementia, severe	
	Severe dementia: Clinical interview may not be possible. Complete dependency due to severe	
	functional impact on daily life with impairment in basic activities, including basic self-care.	
F01.C0	Vascular dementia, severe, without behavioral disturbance, psychotic disturbance, mood	Includes: Major neurocognitive disorder due to vascular disease,
	disturbance, and anxiety	severe, NOS; Vascular dementia, severe, NOS
F01.C11	Vascular dementia, severe, with agitation	
F01.C18	Vascular dementia, severe, with other behavioral disturbance	Also use Z91.83 to identify wandering, if applicable
F01.C2 F01.C3	Vascular dementia, severe, with psychotic disturbance Vascular dementia, severe, with mood disturbance	
F01.C3	Vascular dementia, severe, with mood disturbance Vascular dementia, severe, with anxiety	
. 02.01	resound demential servere, with animoty	
F02	Dementia in other diseases classified elsewhere (formerly F02.80 or F02.81) ²	Excludes1: mild neurocognitive disorder due to known
	<u>Includes</u> : Major neurocognitive disorder in other diseases classified elsewhere	physiological condition with or without behavioral disturbance
		(F06.7-)
	Code first the underlying physiological condition [such as, Alzheimer's (G30), Parkinson's	Excludes2: dementia in alcohol and psychoactive substance disorders (F10, F13, F18, F19 with .27, .97); vascular dementia
	disease (G20) ⁴ , HIV disease (B20), TBI (S06), hypothyroidism	(F01.5-, F01.A-, F01.B-, F01.C-)
	(E00-E03), multiple sclerosis (G35), vitamin B deficiency (E53.8), and so forth] Expands to address severity of dementia as mild, moderate or severe	Dementia in other disease, mild: F02.A
	Provides additional diagnosis codes for behaviors: agitation, anxiety, psychotic disturbances,	Dementia in other disease, moderate: F02.B
	mood disturbances, other behaviors, by dementia type/subcategory	Dementia in other disease, severe: F02.C
		Dementia in other disease, unspecified: F02.8
F02.8-	Dementia in other diseases classified elsewhere, unspecified severity	
F02.80	Dementia in other diseases classified elsewhere, unspecified severity, without behavioral	FYI: F02.80 is revised for use only as unspecified severity (without
	disturbance, psychotic disturbance, mood disturbance, and anxiety	<u>behaviors)</u> .
	Dementia in other diseases classified elsewhere NOS ²	
	Major neurocognitive disorder in other diseases classified elsewhere NOS ²	
F02.811	Dementia in other diseases classified elsewhere, unspecified severity, with agitation	
F02 010	Demonstra in other dispasses classified alcouples a unexpected squarity with other habavioral	Also use 701 92 to identify wandering if applicable
F02.818	Dementia in other diseases classified elsewhere, unspecified severity, with other behavioral disturbance	Also use Z91.83 to identify wandering, if applicable
F02.82	Dementia in other diseases classified elsewhere, unspecified severity, with psychotic	
	disturbance	
F02.83	Dementia in other diseases classified elsewhere, unspecified severity, with mood disturbance	
500.04		
F02.84	Dementia in other diseases classified elsewhere, unspecified severity, with anxiety	
F02.A-	Dementia in other diseases classified elsewhere, mild	Excludes1: mild neurocognitive disorder due to known
	Mild dementia: Clearly evident functional impact on daily life, affecting mainly instrumental	physiological condition with or without behavioral disturbance
	activities. No longer fully independent/requires occasional assistance with daily life activities.	(F06.7-)
F02.A0	Dementia in other diseases classified elsewhere, mild, without behavioral disturbance,	<u>Includes</u> : Dementia in other diseases classified elsewhere, mild,
	psychotic disturbance, mood disturbance, and anxiety	NOS; Major neurocognitive disorder in other diseases classified
		elsewhere, mild, NOS
F02.A11	Dementia in other diseases classified elsewhere, mild, with agitation	Also uso 701 93 to identify wandering if and inchis
F02.A18	Dementia in other diseases classified elsewhere, mild, with other behavioral disturbance	Also use Z91.83 to identify wandering, if applicable
F02.A2	Dementia in other diseases classified elsewhere, mild, with psychotic disturbance	
F02.A3	Dementia in other diseases classified elsewhere, mild, with mood disturbance	

ICD Code	Code Descriptions (sourced from official ICD-10-CM publications ¹)	Official Notes, Helpful Tips, Reminders
F02.B-	Dementia in other diseases classified elsewhere, moderate	Excludes1: mild neurocognitive disorder due to known
102.5	Moderate dementia: Extensive functional impact on daily life with impairment in basic activities. No longer independent and requires frequent assistance with daily life activities.	physiological condition with or without behavioral disturbance (F06.7-)
F02.B0	Dementia in other diseases classified elsewhere, moderate, without behavioral disturbance, psychotic disturbance, mood disturbance, and anxiety	<u>Includes</u> : Dementia in other diseases, classified elsewhere, moderate, NOS; Major neurocognitive disorder in other diseases, moderate, NOS
F02.B11	Dementia in other diseases classified elsewhere, moderate, with agitation	
F02.B18	Dementia in other diseases classified elsewhere, moderate, with other behavioral disturbance	Also use Z91.83 to identify wandering, if applicable
F02.B2	Dementia in other diseases classified elsewhere, moderate, with psychotic disturbance	
F02.B3	Dementia in other diseases classified elsewhere, moderate, with mood disturbance	
F02.B4	Dementia in other diseases classified elsewhere, moderate, with anxiety	
F02.C-	Dementia in other diseases classified elsewhere, severe	Excludes1: mild neurocognitive disorder due to known
	Severe dementia: Clinical interview may not be possible. Complete dependency due to severe functional impact on daily life with impairment in basic activities, including basic self-care.	physiological condition with or without behavioral disturbance (F06.7-)
F02.C0	Dementia in other diseases classified elsewhere, severe , without behavioral disturbance, psychotic disturbance, mood disturbance, and anxiety	Includes: Dementia in other diseases classified elsewhere, severe, NOS; Major neurocognitive disorder in other diseases, severe, NOS
F02.C11	Dementia in other diseases classified elsewhere, severe, with agitation	
F02.C18	Dementia in other diseases classified elsewhere, severe, with other behavioral disturbance	Also use Z91.83 to identify wandering, if applicable
F02.C2	Dementia in other diseases classified elsewhere, severe, with psychotic disturbance	
F02.C3	Dementia in other diseases classified elsewhere, severe, with mood disturbance	
F02.C4	Dementia in other diseases classified elsewhere, severe, with anxiety	
F03	Unspecified Dementia (formerly F03.90 or F03.91)	Excludes1: senility NOS (R41.81)
	Includes : Major neurocognitive disorder NOS, Presenile dementia NOS, Presenile psychosis	Excludes2: mild memory disturbance due to known physiological
	NOS, Primary degenerative dementia NOS, Senile dementia NOS, Senile dementia depressed	condition (F06.8); senile dementia with delirium or acute
	or paranoid type, Senile psychosis NOS	confusional state (F05)
	Expands to address severity of dementia as mild, moderate or severe	Unspecified dementia, mild: F03.A

For those categories for which an unspecified code is not provided, the "other specified" code may represent both other and unspecified. Excludes1 A Nype 1 Excludes note is a pure excludes. It means "NOT CODED HERE!" An Excludes1 note indicates that the code excluded should never be used at the same time as the code above the Excludes1 note. An Excludes1 is used when two conditions cannot occur together, such as a congenital form versus an acquired form of the same condition. Excludes2 A Nype 1 Excludes note represents 'Not included here'. An Excludes2 note indicates that the condition excluded is not part of the condition it is excluded from but a patient may have both conditions at the same time. When an Excludes2 note appears under a code it is acceptable to use both the code and the excluded code together. Sec Classification (FY2024, effective w/DOS 10/01/2023): Parkinson's 620-diagnosis codes. G2001. Parkinson's disease without dyskinesia, with fluctuations G2002.
