

HOSPICE PROFILE AND CONTACT INFORMATION

Hi there,

You are trying to update the response which you have previously submitted. This is NOT the latest link. Please use the latest link which you have received via email.

Thank you.

NHPCO Measures of Excellence

The Measures of Excellence will serve as a data repository comprised of a number of annual and quarterly data collection asks (patient safety data, staffing data, patient demographic data, organizational data, etc.). NHPCO will

use the data from the repository to generate a rolling 12-month quarterly report that includes benchmarking and trending and ability to slice data by geography, size, etc.

Select the quarter for which you will submit the data.

- Current Quarter
- Previous Quarter

NHPCO DART ID:

The DART ID is the NHPCO identification number assigned to your hospice. It is the same ID you used to enter the DART system. Enter N/A if you are not a NHPCO Member.

PAYER MIX

LEVEL OF CARE AND PAY SOURCE DIRECTIONS: Do not leave any space blank. If your hospice did not serve any patients

in a payment source/level of care category, please keep the auto populated 0.

CALCULATION INSTRUCTIONS:

- Number of Patients Served: Include all patients who received services during this quarter. Count each patient only one time per payment source (do not count readmissions within the same payment source).
- Days of Care: Report patient days for all patients served during this quarter.
- Patients who changed the primary pay source during this quarter.:
 - Include patients under every applicable payment source (this means a patient will be counted more than once in the Number of Patients Served column).
 - Include the number of days of care for each applicable payment source.
 - Count each day only once. If there is more than one pay source on any one day, include that day in the column that represents the 2nd/more recent pay source.

Number of Patients Served by Pay Source

PATIENT VOLUME

REFERRALS

DIRECTIONS:

Provide the totals for this **quarter** for each category in the following table.

A referral is defined by one or more of the following:

- (1) a request for assessment for possible admission to hospice from a physician, case manager, discharge planner, health care organization staff person, or equivalent
- (2) contact by a patient, or family or friend of a patient, that identifies a specific patient who may need hospice care.

This definition of a referral is intentionally broad and is intended to capture all calls and contacts that identify a potential hospice patient.

NOTE: *For various reasons, hospices usually do not admit all patients who are referred for care. Therefore, the number of referrals is rarely the same as the number of*

admissions. A value entered for number of referrals that is the same as the value entered for new admissions will be excluded from the data analysis.

Number

Referral Sources Provide the number of referrals from the following sources:

Community-based Physician or Practice

(For example: community-based oncology group practice)

0

Acute Care Facility

(For example: hospital unit)

0

Long Term Care facility

(For example: nursing homes and residences)

0

Home Health Agency

0

Ambulatory Care Facility

(For example: hospital based clinics; dialysis centers)

0

Self/Family/Friend

0

Other *(For example: adult day care, another hospice)*

0

0

PATIENTS SERVED

DIRECTIONS: Provide the totals for this **quarter** for each category in the following table.

Include all patients in inpatient or residential facilities in totals.

For patients cared for by another hospice before admission to your hospice: Include only information related to the patients' stay with your hospice. Do not include information related to prior admissions and patient days for any hospice other than your own.

Number

Total New Admissions

Patients who were admitted to your hospice program for the first time during this quarter. Include only the first admission for each patient.

0

Re-Admissions that are new to your program

Patients that are admitted new to your program but received hospice care previously from a different hospice any time prior to this quarter.

0

Re-Admissions from this quarter

Patients who received services from your hospice program previously that were discharged, and were readmitted in this quarter. Include every re-admission that occurred during this quarter, no matter how many times a patient may have been discharged and readmitted.

0

#Conjoint, Total#

0

Total Carry-overs

Patients who were part of your hospice program's census on the last day of the previous quarter and continued to receive uninterrupted services at the start of the current quarter.

Number

Number

Total Carry-overs

Total Patients Served

Discharges in this quarter

Count each discharge for patients who were discharged more than one time.

Transfers and Non-Death Discharges by Category

Provide the number of non-death discharges in this quarter for each of the categories listed. Count each discharge for patients who were discharged more than one time. Include all patients in inpatient or residential facilities in totals.

Number

Patients Discharged by Hospice

Include patients who were not recertified because they were no longer terminally ill (prognosis extended); patients who moved out of service area and were not transferred to another hospice; and patients discharged for cause.

Do NOT include patients who were discharged due to untimely Face-to-Face and readmitted if there was no interruption in provision of care.

Patient moved out of provider service area

Number

Patient entered a non-contracted facility

Patient no longer terminally ill

Patient discharged for cause

Patients Who Withdrew From Hospice Care

Include patients who revoked the Medicare hospice benefit; desired treatment inconsistent with hospice plan of care; and patients who refused service

Patients Who Were Transferred to Another Hospice

Include patients who were transferred to another hospice without interruption of their Medicare hospice benefit (CMS claim codes 50 or 51).

Total Discharges

PATIENT DEMOGRAPHICS

DIRECTIONS:

- Include all patients in inpatient or residential facilities in totals, unless the question clearly requests separate information for home hospice care and inpatient/residential programs.
- Include only patients who were admitted in this quarter (*see calculation instructions below*)
- Report the number (NOT %) of patients admitted during this quarter for each category in this section.
- If your hospice did not admit patients in one or more of the age categories, enter 0 in the appropriate space.

CALCULATION INSTRUCTIONS:

Include patients admitted for the first time in this quarter. Count each patient only one time. This means patients who were admitted multiple times in this quarter are counted only once. Do not include patients carried over from the previous quarter.

Patient Data:

Total New Patients Served : \$ {e://Field/patients_served}

VOLUNTEER SERVICES

VOLUNTEERS SERVICES

DIRECTIONS: Provide the totals for this **quarter** for each category. Medical director's volunteer hours should be entered in Section on Productivity. (The productivity tables include a category specifically for volunteer physicians.)

CALCULATION INSTRUCTIONS:

- Number of Volunteers:

The number of volunteers should be an unduplicated count, with no individuals included in more than one category, even if they engaged in more than one type of volunteer service. Some volunteers participate in multiple types of activities, such as spending time with patients and assisting with fundraising mailings. If any of the activities performed by a volunteer involved direct contact with patients or families, the volunteer should be counted in the direct care category, regardless of the proportion of time spent providing direct care.

- Volunteer Hours:

For those volunteers who contributed hours in more than one volunteer service category, provide the number of hours for each category.

NOTE: Direct Patient Care Volunteer hours and Administrative Volunteer hours combined meet the Medicare Condition of Participation (COP) requirement for volunteer time equal to 5% of patient care hours. General Support Volunteer hours do not contribute to the 5% requirement.

Direct Patient Care Volunteers:

Direct patient care volunteers are defined as volunteers who provide services through direct contact with patients and families, such as spending time with patients or making calls to patients and families as part of a weekend “tuck-in” program.

Number

Number of Volunteers

Number of Volunteer Hours

Number of Volunteer Visits

Number of Volunteer Phone Calls

Administrative Volunteers:

Administrative volunteers are defined as volunteers who provided services, such as clerical duties, answering

phones, or organizing supplies, that support patient care and clinical services.

Number

Number of Volunteers

Number of Volunteer Hours

Total number of Volunteer hours (Direct and Administrative):

General Support Volunteers:

General support volunteers provide services, such as help with fundraising and serving as members of the board of directors, which make an overall contribution to the hospice.

Number

Number of Volunteers

Number of Volunteer Hours

All Hospice Volunteers:

Total Number of Volunteers - The total number of All Hospice Volunteers should equal the sum of Direct Patient Care Volunteers, Administrative Volunteers, and General Support Volunteers.

Total Number of Volunteer Hours - The total number of All Volunteer Hours should equal the sum of hours for Direct Patient Care Volunteers, Administrative Volunteers, and General Support Volunteers.

Number

Total Number of Volunteers

Total Number of Volunteer Hours

Patients Who Received Volunteer Services:

Include only those patients who received services from a direct care volunteer **in this quarter**. Patients who received services from more than one volunteer should be counted only one time.

Number

Number of Patients Who Received
Volunteer Services:

BEREAVEMENT SERVICES

BEREAVEMENT SERVICES

DIRECTIONS:

- Provide the following information for this **quarter**.
- In calculating responses for questions, include all bereavement clients who received services during this quarter, both those currently on bereavement rolls and those who were discharged from bereavement services.

Total Number of Contacts by Visit Include any face-to-face one-to-one contact with individuals, regardless of setting. *Do NOT include support group or camp services.*

Total Number of Contacts by telehealth (Phone Call, audio and visual connections)

Total Number of Individuals who Received Bereavement Services Include all individuals enrolled for bereavement, including those served through support groups and camps.

In this quarter, did your hospice provide bereavement services to individuals in the community who were NOT associated with a family member or friend who received hospice services?

- Yes
- No

Select all services that your hospice provides

- Support groups
- Individual counseling
- Online support
- Pediatric bereavement services

PRODUCTIVITY

PRODUCTIVITY

DIRECTIONS:

Provide the totals for this **quarter** for each category. Do not include inpatient staff when completing this section. Data for inpatient staff should be entered in Hospice Facility Section.

Complete Tables below using the following definitions and calculation instructions:

DEFINITIONS:

Direct Care: includes all activities involved in care delivery, including visits, telephone calls, charting, team meetings, travel for patient care, and arrangement or coordination of care. When a supervisor provides direct care, estimate the time involved in direct care, as distinct from supervision of other staff or program activities.

PRN Employees: also called "per diem" employees, are called upon to work when necessary without a commitment to work a specific number of hours for your agency. They may be available all of the time or they may be only available for certain days or times. However, they are not the same as part time

employees, even though they may routinely work on the same day or number of hours each week. A part time employee is expected to work a certain number of hours each week, but there is no expectation for number of hours for a PRN employee.

Separation: a voluntary or involuntary termination of employment.

FTE: One full time equivalent (FTE) is 2080 hours per year (40 hours per week times 52 weeks). Provide actual FTEs utilized, not the budgeted number of FTEs.

CALCULATION INSTRUCTIONS:

Total FTEs: Divide paid hours by 2080. Include vacation, sick leave, education leave, and all other time normally compensated by the agency. Categorize your FTEs as you do for the Medicare Hospice Cost Report. Include hourly, salaried and contract staff.

On-call FTEs: First, calculate total payments made for on-call nursing staff. Next, calculate the average salary of a full-time nurse providing direct patient care. Then divide the total payments for on-call by the average nursing salary.

Separations: Do not include PRN employees in the calculation of total separations.

Staffing by Discipline -

Please provide the following staffing information for this **quarter**. **Do not include hospice facility staff here.**

Total Employees (on last Day of this quarter, no PRN)	Total PRN Employees (average for year if fluctuates)	Total of Employees Certified in Hospice & Palliative Care	Seq (al n

CASELOADS

DIRECTIONS: Provide the number of patients in the average daily caseloads for the following positions in this **quarter**.

Definition: Case load is the number of patients for which a staff member has responsibility for or to which she/he is assigned at a time.

- Enter a single number, NOT a range.
- Do not include inpatient staff.

Caseload definition clarification:

Some disciplines, such as chaplains and social workers, may be responsible for contacting all patients and families, but visit only a proportion of them. In this situation, include ONLY those patients who receive visits as part of their care plan in determining caseloads.

Number

Primary Nurse/Nurse Case Manager – RN with primary responsibility for the patient's care.

0

Social Worker – SW with medical social services duties, as defined by CMS. Include only those patients who received visits in determining SW caseloads.

0

Hospice Aide

0

Chaplain – Include only those patients who received visits in determining chaplain caseloads.

0

Volunteer Coordinator – Include only those patients who were assigned a volunteer in determining volunteer coordinator caseloads.

0

Hospice Physician – Include only those patients for whom the medical director was the attending physician in determining caseloads.

0

Nurse Practitioners – Include only those patients for whom the nurse practitioner was the attending in determining caseloads

0

EMERGENCY ROOM VISITS and HOSPITALIZATIONS

EMERGENCY ROOM VISITS and HOSPITALIZATIONS

DIRECTIONS: Provide the following information for patients enrolled in hospice at the time of an ER visit, observation stay or hospital admission for which Hospice General Inpatient Care (GIP) was not billed.

Definition: A hospitalization is defined as receipt of medical care in a hospital (including care provided in the ER) for any reason other than for general inpatient care (GIP).

Count visits to the hospital in all of the following situations:

- the patient received care in the Emergency Room or observation stay and was subsequently admitted to the hospital
- the patient received care in the Emergency Room and was subsequently placed on observation status
- the patient received care only in the Emergency Room and was NOT admitted to the hospital
- hospitalization was related to the patient's terminal diagnosis?
- hospitalization was NOT related to the patient's terminal diagnosis
- hospitalization was arranged or authorized by the hospice and was NOT for GIP level of care

- hospitalization was NOT arranged or authorized by the hospice
- hospitalization resulted in discontinuation of hospice care (discharge or revocation)
- hospitalization did NOT result in discontinuation of hospice care

Do NOT include:

- admissions to the hospital for the provision of care at the General Inpatient level of care (GIP) or Inpatient Respite level of care
- hospitalizations that occurred prior to admission to hospice services

Number of unduplicated patients who were hospitalized (ED, observation, acute hospital stay) in this **quarter**

PATIENT FALLS

Are there any patient falls to report for this quarter?

Yes

No

Patient Falls:

The following section captures information about **witnessed patient falls by type of injury.**

Jan Feb Mar Apr May Jun Jul Aug

No injury: Patient did not sustain an injury secondary to the fall

0	0	0	0	0	0	0	0
---	---	---	---	---	---	---	---

Minor: Indicates those injuries requiring a simple intervention (i.e. band aid or protective dressing to injured area)

0	0	0	0	0	0	0	0
---	---	---	---	---	---	---	---

Moderate: indicates injuries requiring sutures or splints

0	0	0	0	0	0	0	0
---	---	---	---	---	---	---	---

Major: injuries are those that require surgery

0	0	0	0	0	0	0	0
---	---	---	---	---	---	---	---

Death: refers to those that result from injuries sustained from the fall

0	0	0	0	0	0	0	0
---	---	---	---	---	---	---	---

INPATIENT AND RESIDENTIAL FACILITIES 1

Does your hospice operate one or more dedicated hospice facilities or units?

- Yes
- No

DIRECTIONS:

- Please provide the following information for this **quarter**.
- If your program operates more than one unit or facility, please indicate how many facilities you have, and the survey will ask about each.

How many facilities or units does your hospice operate?

INPATIENT AND RESIDENTIAL FACILITIES 2

Hospice \${Im://CurrentLoopNumber}

Total number of beds

Facility Name

Where is the inpatient facility sited? Select one

- Freestanding
- Hospital based
- In a Nursing Home
- Other (if Other, please specify)

What level of care does the inpatient facility provide?
Select one

- Acute/General Inpatient - (short term, intensive hospice services provided to meet the hospice patient's need for skilled nursing, symptom management, complex care, or inpatient respite)
- Residential Care- (hospice home care provided in a facility rather than in the patient's personal residence)
- Mixed Use both - acute and residential levels

Definition:

Average daily census = To calculate the average daily patient census in a month, add the daily census for each

day of the calendar month and divide the total by the number of days in a month. Each census day begins at 12:00am and ends at 11:59pm. Because Medicare uses the midnight census hour as a cut-off for determining a Medicare day, this standard is generally used by the industry.

Average Length of Stay: The average length of stay is calculated by adding the total length of stay for each discharged patient in the month and dividing by the number of discharge patient in a month.

	GIP	Respite	Routine
Average Length of Stay per Level of Care	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>
Median Length of Stay per level of care	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>
Average Daily Census per Level of Care	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>

Hospice Facility Staffing by Discipline

DIRECTIONS: Complete the table below using the following definitions and calculation instructions:

- FTE: One full time equivalent (FTE) is 2080 hours per year (40 hours per week times 52 weeks). Provide actual FTEs utilized, not the budgeted number of FTEs.
- Direct Care: includes all activities involved in care delivery, including patient care, team meetings, and arrangement or coordination of care. When a supervisor provides direct care, estimate the time involved in direct care, as distinct from supervision of other staff or program activities.
- PRN Employees: also called "per diem" employees, are called upon to work when necessary without a commitment to work a specific number of hours. They may be available all of the time or they may be only available for certain days or times. However, they are not the same as part-time employees, even though they may routinely work on the same day or number of hours each week. A part-time employee is expected to work a certain number of hours each week, but there is no expectation for number of hours for a PRN employee.

CALCULATION INSTRUCTIONS:

- Total FTEs: Divide paid hours by 2080. Include vacation, sick leave, education leave, and all other time normally compensated by the agency. Categorize your FTEs as

you do for the Medicare Hospice Cost Report. Include hourly, salaried and contract staff.

	Total Inpatient Facility FTEs	Total PRN Employees (average for year if number fluctuates)	Total Separations (all causes, no PRN)
<p>Nursing - Direct Care Include RNs. Do <u>not</u> include supervisors or other clinical administrators unless a portion of their time is spent in direct care.</p>	0	0	0
<p>Nursing - Direct Care Include LPNs. Do <u>not</u> include supervisors or other clinical administrators unless a portion of their time is spent in direct care.</p>	0	0	0
<p>Nurse Practitioner Include nurses with an advanced degree who function are are licensed as a Nurse Practitioner.</p>	0	0	0
<p>Social Services Include medical social services staff as defined by CMS for the Cost Report. Do <u>not</u> include chaplains or bereavement staff.</p>	0	0	0
<p>Hospice Aides</p>	0	0	0
<p>Physicians - Paid Include medical directors and other physicians providing direct care to patients and participating in clinical support. Exclude volunteer physicians.</p>	0	0	0
<p>Physicians - Volunteer</p>	0	0	0

	Total Inpatient Facility FTEs	Total PRN Employees (average for year if number fluctuates)	Total Separations (all causes, no PRN)
Chaplains	0	0	0
Other Clinical - Include any paid staff, in addition to those captured above, who make visits as part of direct care to patients or families. Include therapists, dietitians, etc. Do not include volunteers or bereavement staff.	0	0	0
Non-Clinical Include all administrative and general staff or contracted staff whose responsibilities are limited to support for the facility <i>Do not include volunteers.</i>	0	0	0
